Posted a green card for the CA to call me. The gates were closed and locked on the property and there was a John Deere parked in the drive way against the gates. I left Sgt. Huennekens desk line because I will be off of work for the next four days.

1/19/17. Made contact with Katja at the property. She allowed me inside her property to observe the animals. All of the animals are in good weight. The paint horse with the bad knee came to the rescue several years ago in its present condition and is on previcox for any discomfort. This horse appeared bright, alert, and in no observable discomfort. The dark bay horse shown in the photographs was in excellent condition with no signs of any health issues. All of the pens the horses are kept in are in good condition and are of adequate size. The horses with the large hernia was bright, alert, and appeared to be in otherwise good condition. Case closed, Sgt. Huennekens.
